

Hello! Thank you for your consideration!

My name is Jack Pedleham. I am a 3D Artist with experience in photorealistic visualisation, architectural visualisation, VR and retail design.

Over the last 6 years I have worked with various 3D Agencies but I started my career at ASDA head office as a 3d designer for construction and marketing where I worked in a close knit team to develop new store concepts and deliver new retail designs to the ASDA estate.

More recently I was employed by Overview Studios to create photorealistic CG interiors for large kitchen and bathroom suppliers across the country. Prior to my position at Overview I also worked at Riot CGI as a senior artist, creating interior and exterior visuals for furniture companies, Architectual studios and marketing companies.

I have a passion for technology and I take a keen interest in virtual reality, photoscanning and augmented reality having completed a number of small proof-of-concept projects in Unreal Engine in the past few years. Im also competent with PC hardware and networking.

I enjoy other areas of content creation such as video editing, web design, graphic design, audio recording and photography meaning I have a good general skillset for multimedia creation.

I welcome the opportunity to showcase some of my recent work and discuss how my skills and strengths can best serve you and your company.

I appreciate your time and consideration.
Kind regards

Jack Pedleham
